Organic milk production: recent trends and future prospects/Neelam Sachan and V.P. Singh. Livestock is the backbone of our rural economy. Livestock sector is incompetent without good fodder production system. This book also covers one such fodder production. Housing system, hay, silage, seed production technology, feed additives and anti-nutritional factors are also covered in this book. Not only management, scope of this book also covers production and health aspects. Many important livestock diseases, heavy metal toxicities in chicks and mad cow disease are covered in this book. Importance of herbal drugs and area specific mineral mixture have also been discussed. An appropriate breeding strategies are very important for improving the genetic makeup of the livestock population and hence for improving economic gains from livestock. Bioinformatics have the potential in the development of correct breeding programmes and policy frames in India. Livestock sector has developed far beyond meat and milk industry. Today is the time of...
