It will be best however to add one cipher to the dividend at the outset. And when the dividend is thus multiplied by 10, if we multiply the divisor also by 10, the value of the quotient will not be affected. Now for the first 90 pages of the table, the divisors (which are the tabular differences for 1, ) have one decimal figure, and multiplying them by 10 makes them all integral. So far as these 90 pages are concerned, the following example will serve to show how the division is to be performed. Let 2442 be the number to be divided, and 335.3 the tabular difference for 1 by which...
