

## Proceedings of the American Institute of Electrical Engineers Volume 38, PT. 1 (Paperback)

Filesize: 7.68 MB

### ***Reviews***

*The best pdf i possibly go through. it was writtern quite properly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

*(Miss Sienna Fay Jr.)*

## PROCEEDINGS OF THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS VOLUME 38, PT. 1 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .It is dependent only upon the kind of material used, method of application, treatment and aging. An attempt to give minimum curves of the stress at which ionization starts (g assuming no gas space) for samples of rectangular cross section leads only to misrepresentation and confusion. The tendency for the insulation to bulge away from the straight sides of the conductors, and therefore the maximum thickness of gas space, is not only more vitally dependent upon those factors associated with samples of round cross section, but also upon the dimensions of the conductor and thickness of insulation. Then too, we are approaching values of  $t_a$  that are appreciable when compared with the thickness of insulation and for this reason  $g$ , varies with thickness. The most satisfactory way to deal with rectangular cross sections, such as armature coils, is to measure the voltage at which ionization starts in each individual case. The value of  $E$  will indicate whether the particular type of coil can be safely operated at its rated voltage or not. Also, the thickness of gas space determined from these measurements will indicate the degree of puffing or bulging by comparison with a similar sample of round cross section, which can be considered as a standard representing the best possible attainment, that is, as having the least values of  $t_a$  for the given conditions. Before dealing with actual tests on coils consideration will again be given to round cross sections to illustrate, by indirection, a...
