AND 2. 0 SCOPE PROJECT METHODOLOGY GOAL OF THE PROJECT The major goal of this study was to ascertain the elastic blade twist due to wind turbine operation which leads to errors in the prediction of loads and performance for three promising and representative A wind turbine rotors. secondary goal was to develop, verify, and present a practical engineering methodology for the estimation of this elastic twist on other wind turbine rotors. SEMI-EMPIRICAL APPROACH This program was divided into two parts of equal importance, experimental and theoretical. There were not enough resources in the program to permit a sophisticated engineering analysis in either area, so a practical engineering approach was taken (Fig. and has proved efficient and effective. This allowed 24, the derivation of semi-empirical blade aeroelastic models with which to calculate the steady elastic twist.
