

Astronomical Observations Made at the Observatory of Cambridge Volume 9 (Paperback)

By University Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1837 Excerpt: .and of Occultations of Stars by the Moon, are recorded in pages 144 and 145. The Calculation of the Occultations (pp. 146-155) has been conducted in the same manner as in previous volumes of the Cambridge Observations, by the method described in the Volumes for 1830 and 1831. Precisely the same method is applied to the observations of the disappearance of one of the Solar Spots and reappearance of another, the right ascensions and declinations of the Spots at the times of observation being known by means of the auxiliary observations already described. The final equations resulting from the Calculations of the beginning and end of the Solar Eclipse of May 15, (p. 153-155.) were formed by equating the apparent distances of the centers of the Sun and Moon at the instants of observation, calculated for the place of observation from data in the Nautical Almanac,...
