

Principles of Geometry, Vol. 4 (Classic Reprint) (Paperback)

Filesize: 3.71 MB

Reviews

These kinds of ebook is the perfect publication offered. It is among the most incredible publication i have go through. You will not feel monotony at whenever you want of your time (that's what catalogues are for concerning if you check with me).

(Delia Schoen)

PRINCIPLES OF GEOMETRY, VOL. 4 (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 226 x 142 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Principles of Geometry, Vol. 4 The present chapter consists of various examples of the interest and importance of the comparison of the geometry of spaces of different dimensions. The first section (pp. 1-32) is concerned with relations between theorems in to and in three dimensions. The second section (pp. 32-40) deals with the representation in four dimensions of some results belonging to ordinary space of three dimensions. The last section (pp. 40-64) deals with the employment of space of five dimensions for the consideration of properties arising both in three and in two dimensions. Some few references occur to space of any number of dimensions. Section I. Theorems Of Two And Three Dimensions The conics touching the fives from six arbitrary lines of a plane. Let three lines, p , q , r , be given in a plane, as well as a fourth line containing two points, I , J ; let any conic be drawn touching the four lines; let be the conic, through the points I , J , which contains the three intersections of the lines p , q , r ; then this conic passes through the point, S , in which intersect the tangents from I , J to the former conic. Or, in other words (Vol. II, p. 81), the circle through the intersections of three tangents of a parabola contains the focus of this parabola. Thus if four lines be given, beside the line which contains the points, J , the conic touching the five lines being then definite, the four conics, all through I , J , each containing the intersections of three of the four given lines, meet in a point, namely, the point, S , in which the tangents from I ,...
