Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Optical Shop Practice The optical business has passed through its embryonic stage and has emerged into the world of science. It has attained a position wherein modern thought and achievement have made it a vital part of our daily life, for the exacting qualifications of modern times demand quickness of perception, and the faculty of perception depends upon the eye to a very great degree. Accuracy is the paramount factor in meeting these requirements - scientific accuracy. However, despite this condition, the practice of optical work is simple enough, if those who follow it adhere to the fixed rule of following demonstrated procedures governed by good judgment. Very few individuals are without the power of concentration to a greater or less extent, and this faculty can be cultivated by practice and care. Just as the babe must first learn to stand alone before being able to walk and then to run, the optical shopman must go at his work by easy stages and by persistence will finally master his objective. This volume has been designed for the beginner. It is written in simplified form, avoiding technical language as much as possible, and the average boy or girl of fifteen should be able to grasp its message. It handles its subject from the practical viewpoint and covers every step necessary, so that the student who follows its directions will be able, by applying the same in a practical way, to develop into an efficient worker.
